Google Hacking Making Competitive Intelligence Work for You

Copyright 2008 Security Constructs, LLC All rights Reserved Tom Bowers President Philadelphia InfraGard Managing Director, Security Constructs, LLC

Competitive Intelligence

- 1. What is it?
- 2. How is it done?
- 3. Is it legal?
- 4. How do we prevent it?

Basics

- Who
- What
- When
- Why
- Where
- How

"Godiva Chocolatier Inc"

- What business is it in?
- How big is it?
- Where are they located?
- Is it publicly traded?
- What are the annual sales and growth?
- Pending legal issues?
- Who are the decision makers?

Refining the Search

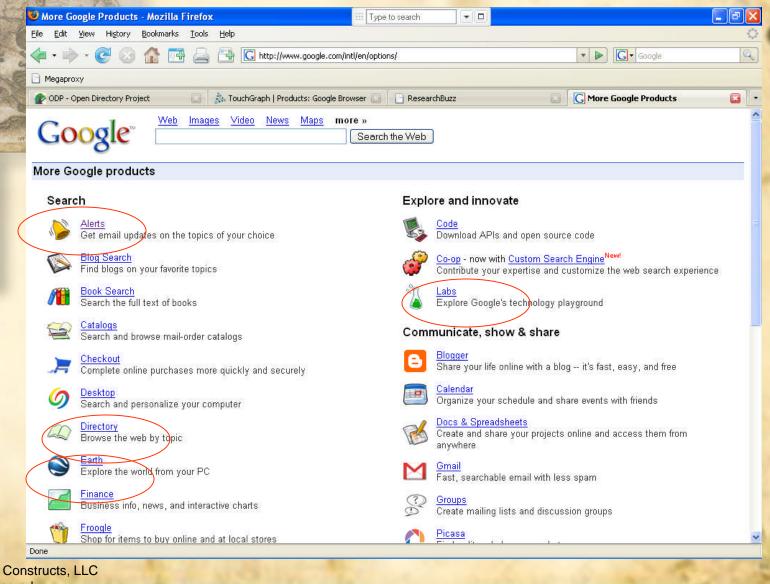

- Use "intitle" versus "inurl" (looking for dirt)
- 2. Scour news sites and newsgroups
- 3. Check financial filings
- 4. Check security analyst reports
- 5. Use Google Groups and Blogs

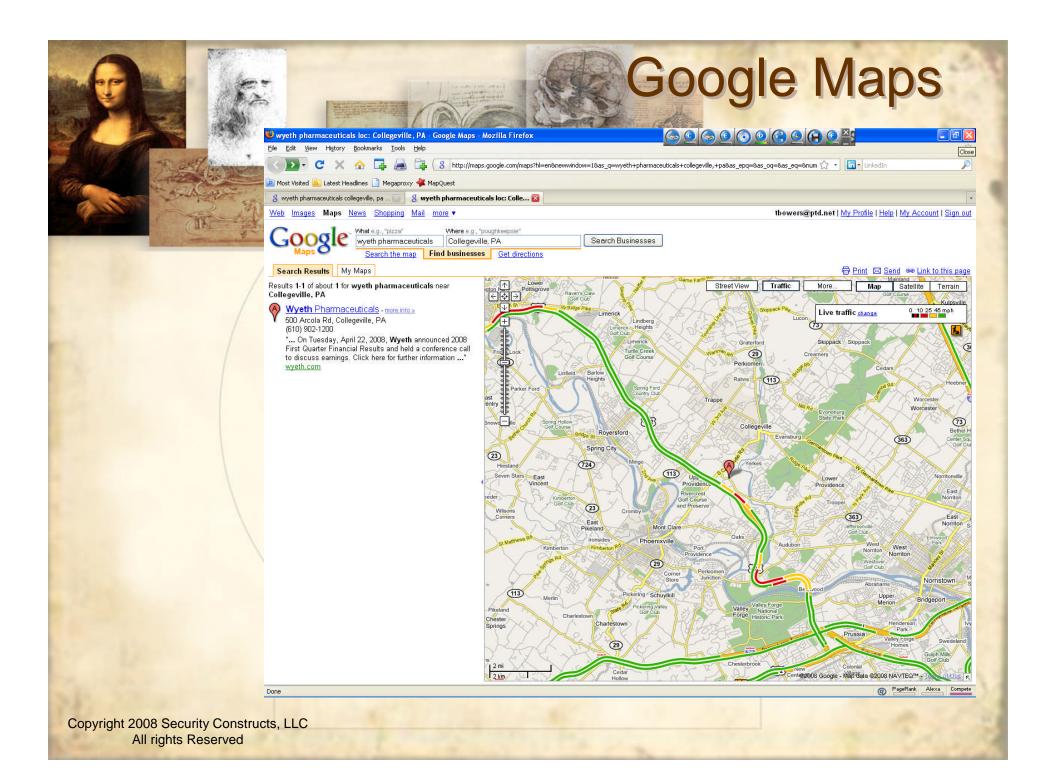

Google Tools

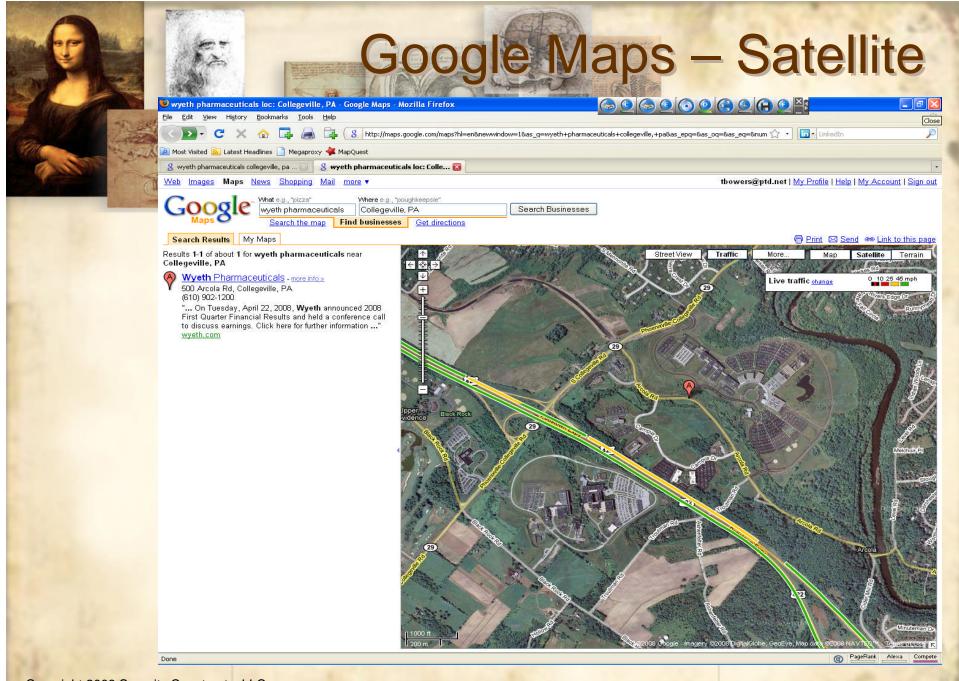

Google Answers (retired) Google Scholar Google Earth Google Patent Search Google Blog Search Google Alerts Google Maps

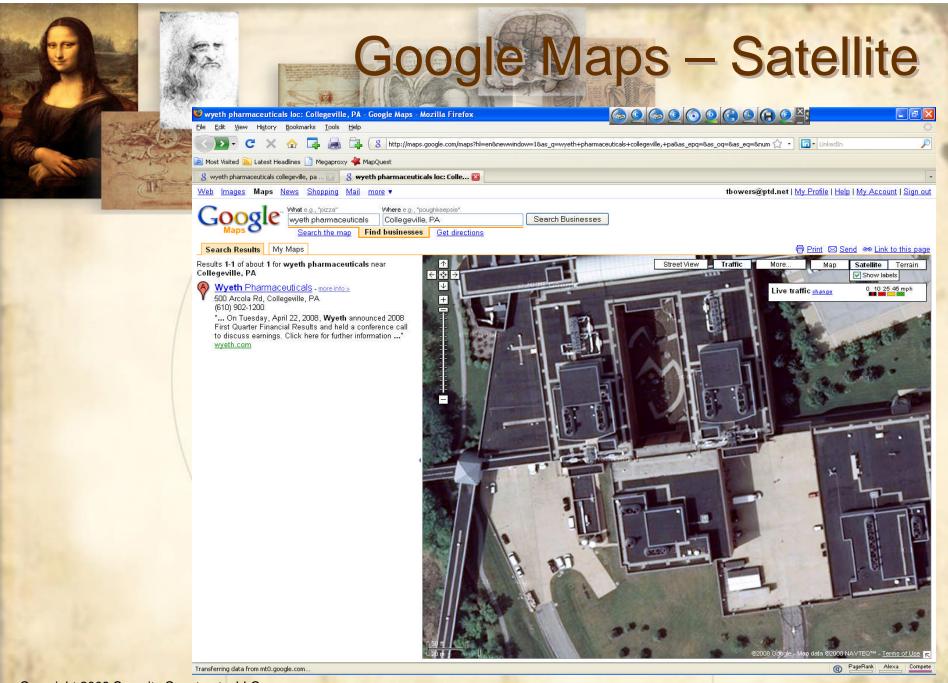

answers.google.com scholar.google.com earth.google.com www.google.com/patents blogsearch.google.com www.google.com/alerts maps.google.com

Google Options

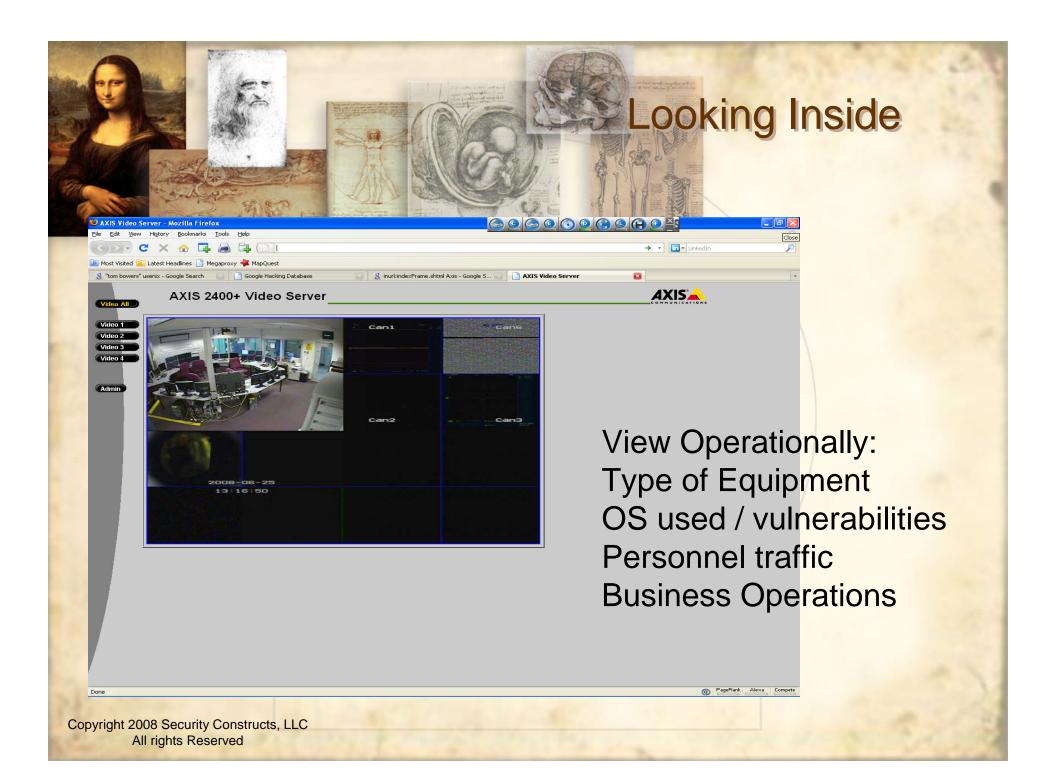

Google Maps - Intel

- 1. Auto traffic
 - 1. Manufacturing schedules
 - 2. Production cycles
- 2. Parking lot analysis personnel
 - 1. Executives dedicated parking
 - 2. Department Heads early arrivals
- 3. Security arrangements
- 4. Plant expansion

Permalink Hey, this is pretty neat. Time Search is designed to allow you to search for information based on time with location or theme. Check it out at <u>http://www.timesearch.info</u>.

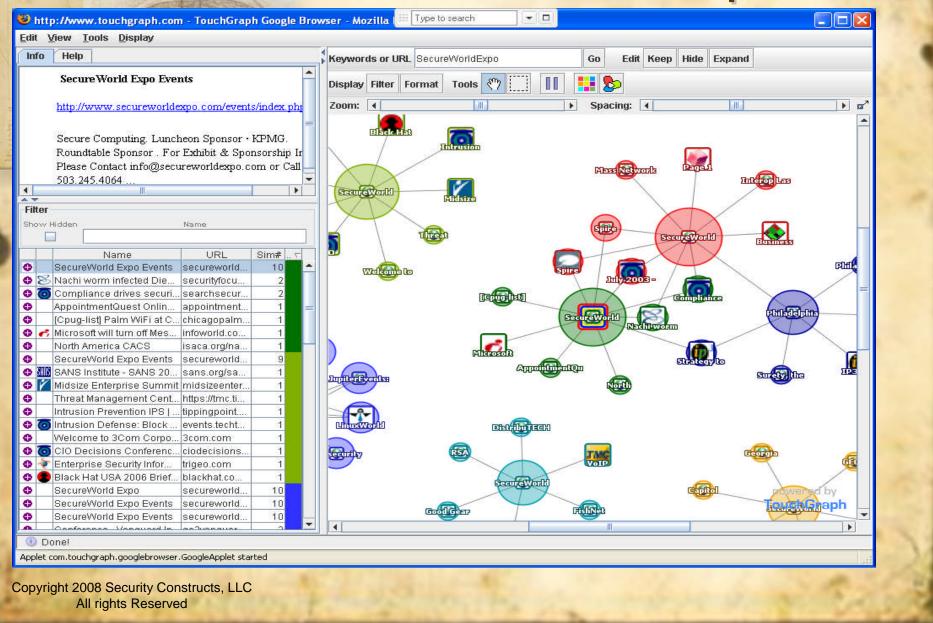

Make sure you have JavaScript turned on because this site doesn't work well without it. Click on the buttons to pick an area if you like (broken down by continent, with sub-areas available; you can also choose World) and pick a theme if you like (technology, war, politics, religion, society, etc.)

If you're REALLY feeling specific, choose which timeline sites to search (click on the Timeline Sites button at the bottom of the query box) then choose the year you want to search and BC or AD.

I chose 79 AD, worldwide, no themes, no restrictions on site. I got a timeline as a search result. The timeline starts at 79AD (*Titus is emperor*) and goes as far as 175 (*Confucians take rubbings*). These are the simple listings. Extended listings cover about a paragraph and as you might imagine are much more extensive. Sometimes the listings leave out a fact or two; the first entry says "Titus becomes emperor" but even the extended listing doesn't say OF WHERE. Now you know and I know, but does everybody know?

Each listing has several icons to the right and left. One set of icons are blue and will take you to text-based search results for several different resources based on keywords in the timeline listing. (For example, the first entry in my search result might have text search links for *Titus*, *Vespasian, "Roman Empire"*, etc.) The other set of icons links directly to Google Image search results for selected words in the timeline entry.

Metadata analysis

Using Metadata Assistant

1. Conduct CI on yourself – your competitors are

- 1. Build a competitive profile
- 2. Who are the movers and shakers
- 3. Lines of business......
- 2. What type of information is leaking and from where?
- 3. Can a business process be modified?
- 4. Active disinformation? (running equipment at odd times...)
- 5. Will a new policy help? (business or security)
- 6. Can I leverage existing security technologies?
- 7. Are there new technologies?

Case Study

1. Los Alamos and Oak Ridge Spear Phishing attack

- 1. Visitor database only
- 2. 12 different attackers, 7 emails to 1000's of employees
- 3. Which scientist visited, how often and what is their expertise.
- 4. Allows us to build a competitive profile of the type of research being done at these facilities and by extension what type of research these facilities are capable of.

2. What about your business?

- 1. Whaling Attack phishing your executives
- 2. Specific companies
- 3. Specific groups within a company
 - 1. Who are the movers and shakers
 - 2. Email addressing schema (look and feel)
 - 3. Who do these people normally talk to
 - 4. Detailed contact information
 - 5. Similar to Executive Recruiters today

Quantity of proxies, involved in monthly payment. Ouantity restriction on proxies which you can use for a day Tariffs have a refund system implied to a proxy that goes dead while work

PAYMENT IS ACCEPTED VIA : Webmoney, Egold

Support (only in English) & demo accounts: ICQ : 555019, 990100

Terms of Service

Peculiar Properties of Tariff Rates :

per use:

The Per Use Tariff Rate includes one month payment; the payment involves a certain amount of proxy servers which you can take from the base as many as you wish without any restrictions. If you have not used the proxies included in the monthly payment, these proxies are not extended to the next month. In these Tariffs you can see all proxies which are online at a moment.

Daily:

The Daily Tariff Rate includes one month payment; the amount of proxy servers which you can take from the base within 24 hours is limited in your Tariff Rate-related quantity. With these Tariff Rates, you can see all proxy servers which are online at a moment. If the system finds out for the first 10 minutes* of using a proxy that the proxy has stopped responding, this proxy will not be billed, and the system will automatically refund you .**

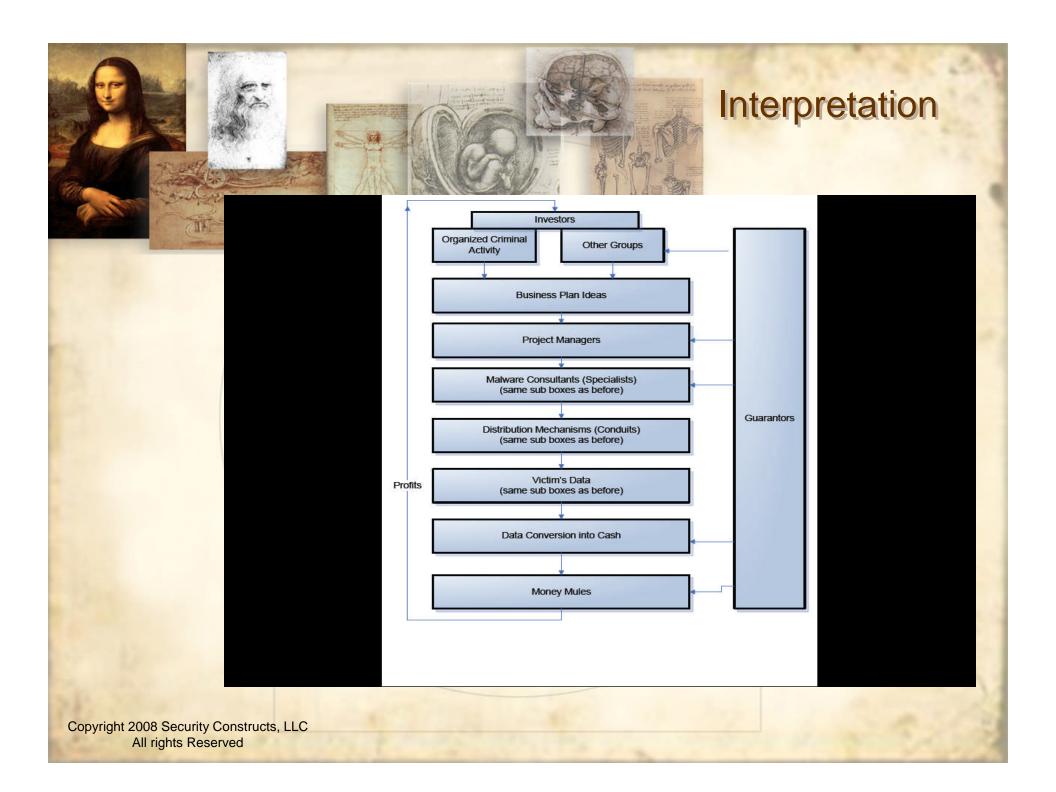

- * Typically, this time is enough to see if a proxy can go on working
- ** At present the system is working in a test mode

Information about Proxy Helper:

Proxy Helper manual (ENGLISH VERSION)

PROHIBITED:

- 1. Account may not be used by more than 1 person (Daily Tariff Rates)
- 2. Proxy Helper may not be used by more than 1 person (All Tariffs)
- 3. A proxy server may not be used for mass mailing (not only in terms of spam)
- 4. A proxy may not be taken from the base by using programs other than your browser (Daily Tariff Rates)

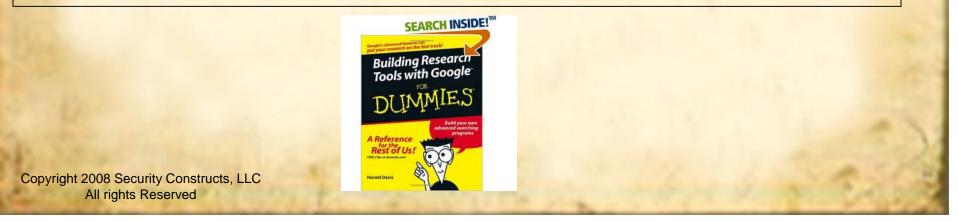

Flexible Protection Architecture

- 1. Policies
- 2. Procedures
- 3. Contracts
- 4. Vendor selection
- 5. Auditing
- 6. Active Protections
- 7. Passive Protections

Building Research Tools with Google for Dummies Harold Davis

Conclusions

If its on Google its probably public information
Google has many tools built in
Many tools are built on Google APIs
Always start with "the question." Then refine, research, refine...
Don't forget the documents themselves
Build a profile, use it to improve your security
