

Closing remarks

Themes (revisit at HotOS-XIII?)

- Networked urbanism: “from passive things to networked resources”
- Sustainability
 - help funding models catch up to utility computing
 - get rid of that idle desktop PC
- Conference submissions process
 - “living papers”: discussion beyond hallways of SOSP
 - rethinking role of journals vs. conferences
- Teaching concurrency
 - distributed systems vs. multicore: similar approach?
 - “real” languages vs. teaching vehicles? level of abstraction?

Thanks: HotOS-XII sponsors
