VNC Manager

Wout Mertens -
wmertens@cisco.com
What is VNC Manager

• Light-weight software thin client
  – Wraps VNC over ssh
  – User can create multiple sessions
  – Enterprise friendly
  – Loadsharing across user systems
  – Uses Perl + Tk (optional)

• Can run on any unix

• Special attention to server-side Solaris
But wait, there’s more!

- 32MB linux image
  - Based on Gentoo
  - Can use USB to authenticate
  - Netboot, cd, flash, whatever
  - Not updated for a while now

Current state

• It works
• It’s not very clean
• http://sf.net/projects/vncmgr
  – Old version, bug me
