Message from the Program Co-Chairs ................................................................. vii

Wednesday, June 22, 2016

Datacenter Networking

FLICK: Developing and Running Application-Specific Network Services .......................... 1
Abdul Alim, Richard G. Clegg, Luo Mai, Lukas Rupprecht, and Eric Seckler, Imperial College London; Paolo Costa, Microsoft Research and Imperial College London; Peter Pietzuch and Alexander L. Wolf, Imperial College London; Nik Sultana, Jon Crowcroft, Anil Madhavapeddy, Andrew W. Moore, and Richard Mortier, University of Cambridge; Masoud Koleni, Luis Oviedo, and Derek McAuley, University of Nottingham; Matteo Migliavacca, University of Kent

SoftFlow: A Middlebox Architecture for Open vSwitch .............................................. 15
Ethan J. Jackson, University of California, Berkeley; Melvin Walls, Penn State Harrisburg and University of California, Berkeley; Aurojit Panda, University of California, Berkeley; Justin Pettit, Ben Pfaff, and Jarno Rajalhalme, VMware, Inc.; Teemu Koponen, Styra, Inc.; Scott Shenker, University of California, Berkeley, and International Computer Science Institute

Fast and Cautious: Leveraging Multi-path Diversity for Transport Loss Recovery in Data Centers ....... 29
Guo Chen, Tsinghua University and Microsoft Research; Yuanwei Lu, University of Science and Technology of China and Microsoft Research; Yuan Meng, Tsinghua University; Bojie Li, University of Science and Technology of China and Microsoft Research; Kun Tan, Microsoft Research; Dan Pei, Tsinghua University; Peng Cheng, Layong (Larry) Luo, and Yongqiang Xiong, Microsoft Research; Xiaoliang Wang, Nanjing University; Youjian Zhao, Tsinghua University

StackMap: Low-Latency Networking with the OS Stack and Dedicated NICs ..................... 43
Kenichi Yasukata, Keio University; Michio Honda, Douglas Santry, and Lars Eggert, NetApp

File and Key-Value Systems

SLIK: Scalable Low-Latency Indexes for a Key-Value Store ....................................... 57
Ankita Kejriwal, Arjun Gopalan, Ashish Gupta, Zhihao Jia, Stephen Yang, and John Ousterhout, Stanford University

Understanding Manycore Scalability of File Systems ............................................... 71
Changwoo Min, Sanidhya Kashyap, Steffen Maass, Woonhak Kang, and Taesoo Kim, Georgia Institute of Technology

ParaFS: A Log-Structured File System to Exploit the Internal Parallelism of Flash Devices ......... 87
Jiacheng Zhang, Jiwu Shu, and Youyou Lu, Tsinghua University

FastCDC: a Fast and Efficient Content-Defined Chunking Approach for Data Deduplication .......... 101
Wen Xia, Huazhong University of Science and Technology and Sangfor Technologies Co., Ltd.; Yukun Zhou, Huazhong University of Science and Technology; Hong Jiang, University of Texas at Arlington; Dan Feng, Yu Hua, Yuchong Hu, Yucheng Zhang, and Qing Liu, Huazhong University of Science and Technology

(Wednesday, June 22 continues on the next page)
Mobile and Apps

Unsafe Time Handling in Smartphones ........................................... 115
Abhilash Jindal, Prahlad Joshi, Y. Charlie Hu, and Samuel Midkiff, Purdue University

Energy Discounted Computing on Multicore Smartphones ................ 129
Meng Zhu and Kai Shen, University of Rochester

Beam: Ending Monolithic Applications for Connected Devices ........ 143
Chenguang Shen, University of California, Los Angeles; Rayman Preet Singh, Samsung Research; 
Amar Phanishayee, Aman Kansal, and Ratul Mahajan, Microsoft Research

Caching Doesn’t Improve Mobile Web Performance (Much) .............. 159
Jamshed Vesuna and Colin Scott, University of California, Berkeley; Michael Buettner and Michael Piatek, 
Google; Arvind Krishnamurthy, University of Washington; Scott Shenker, University of California, Berkeley, 
and International Computer Science Institute

Systems and Network Security

Secure and Efficient Application Monitoring and Replication .......... 167
Stijn Volckaert, University of California, Irvine, and Ghent University; 
Bart Coppens, Ghent University; 
Alexios Voulimenes, University of California, Irvine; 
Andrei Homescu, Immunant, Inc.; 
Per Larsen, University of California, Irvine, and Immunant, Inc.; 
Bjorn De Sutter, Ghent University; 
Michael Franz, University of California, Irvine

Blockstack: A Global Naming and Storage System Secured by Blockchains 181
Muneeb Ali and Jude Nelson, Princeton University and Blockstack Labs; 
Ryan Shea, Blockstack Labs; 
Michael J. Freedman, Princeton University

Satellite: Joint Analysis of CDNs and Network-Level Interference ........ 195
Will Scott, Thomas Anderson, Tadayoshi Kohno, and Arvind Krishnamurthy, University of Washington

Subversive-C: Abusing and Protecting Dynamic Message Dispatch ...... 209
Julian Lettner, University of California, Irvine; 
Benjamin Kollenda, Ruhr-Universität Bochum; 
Andrei Homescu, Immunant, Inc.; 
Per Larsen, University of California, Irvine, and Immunant, Inc.; 
Felix Schuster, Microsoft Research; 
Lucas Davi and Ahmad-Reza Sadeghi, Technische Universität Darmstadt; 
Thorsten Holz, Ruhr-Universität Bochum; 
Michael Franz, University of California, Irvine

Thursday, June 23, 2016

Cloud, Coordination, and Consensus

Callinicos: Robust Transactional Storage for Distributed Data Structures 223
Ricardo Padilha, Enrique Fynn, Robert Soulé, and Fernando Pedone, Università della Svizzera Italiana (USI)

Filo: Consolidated Consensus as a Cloud Service .......................... 237
Parisa Jalili Marandi, Christos Gkantsidis, Flavio Junqueira, and Dushyanth Narayanan, Microsoft Research

Modular Composition of Coordination Services ......................... 251
Kfir Lev-Ari, Technion—Israel Institute of Technology; 
Edward Bortnikov, Yahoo Research; 
Idit Keidar, Technion—Israel Institute of Technology and Yahoo Research; 
Alexander Shraer, Google

Cheap and Available State Machine Replication ....................... 265
Rong Shi and Yang Wang, The Ohio State University

Architectural Interaction

Horton Tables: Fast Hash Tables for In-Memory Data-Intensive Computing 281
Alex D. Breslow, AMD Research and University of California, San Diego; 
Dong Ping Zhang, Joseph L. Greathouse, and Nuwan Jayasena, AMD Research; 
Dean M. Tullsen, University of California, San Diego

Data Is Now Big Data

SplitJoin: A Scalable, Low-latency Stream Join Architecture with Adjustable Ordering Precision ........ 493
Mohamadreza Najafi, Technische Universität München; Mohammad Sadoghi, IBM T. J. Watson Research Center; Hans-Arno Jacobsen, Middleware Systems Research Group

Load the Edges You Need: A Generic I/O Optimization for Disk-based Graph Processing ........ 507
Keval Vora, University of California, Riverside; Guoqing Xu, University of California, Irvine; Rajiv Gupta, University of California, Riverside

Version Traveler: Fast and Memory-Efficient Version Switching in Graph Processing Systems ........ 523
Xiaoen Ju, University of Michigan; Dan Williams and Hani Jamjoom, IBM T. J. Watson Research Center; Kang G. Shin, University of Michigan

Tucana: Design and Implementation of a Fast and Efficient Scale-up Key-value Store .................... 537
Anastasios Papagiannis, Foundation of Research and Technology-Hellas (FORTH) and University of Crete; Giorgos Saloustros, Foundation of Research and Technology-Hellas (FORTH); Pilar González-Férez, Foundation of Research and Technology-Hellas (FORTH) and University of Murcia; Angelos Bilas, Foundation of Research and Technology-Hellas (FORTH) and University of Crete

Virtualization

Samsara: Efficient Deterministic Replay in Multiprocessor Environments with Hardware

Virtualization Extensions ................................................................. 551
Shiru Ren, Le Tan, Chunqi Li, and Zhenn Xiao, Peking University; Weijia Song, Cornell University

Hardware-Assisted On-Demand Hypervisor Activation for Efficient Security Critical Code Execution on Mobile Devices ................................................................. 565
Yeongpil Cho, Seoul National University; Junbum Shin, Samsung Electronics; Donghyun Kwon, Seoul National University; MyoungJo Ham and Yuna Kim, Samsung Electronics; Yunheung Paek, Seoul National University

gScale: Scaling up GPU Virtualization with Dynamic Sharing of Graphics Memory Space ................... 579
Mochi Xue, Shanghai Jiao Tong University and Intel Corporation; Kun Tian, Intel Corporation; Yaozu Dong, Shanghai Jiao Tong University and Intel Corporation; Jiacheng Ma, Jiajun Wang, and Zhengwei Qi, Shanghai Jiao Tong University; Bingsheng He, National University of Singapore; Haibing Guan, Shanghai Jiao Tong University

A General Persistent Code Caching Framework for Dynamic Binary Translation (DBT) ................ 591
Wenwen Wang, Pen-Chung Yew, Antonia Zhai, and Stephen McCamant, University of Minnesota, Twin Cities

Operating Systems

Instant OS Updates via Userspace Checkpoint-and-Restart ................................................................. 605
Sanidhya Kashyap, Changwoo Min, Byoungyoung Lee, and Taesoo Kim, Georgia Institute of Technology; Pavel Emelyanov, CRIU and Odin, Inc.

Apps with Hardware: Enabling Run-time Architectural Customization in Smart Phones .................... 621
Michael Coughlin, Ali Ismail, and Eric Keller, University of Colorado, Boulder

Testing Error Handling Code in Device Drivers Using Characteristic Fault Injection ....................... 635
Jia-Ju Bai, Yu-Ping Wang, Jie Yin, and Shi-Min Hu, Tsinghua University

Multicore Locks: The Case Is Not Closed Yet ................................................................. 649
Hugo Guiroux and Renaud Lachaize, Université Grenoble Alpes and Laboratoire d’Informatique de Grenoble; Vivien Quema, Université Grenoble Alpes, Grenoble Institute of Technology, and Laboratoire d’Informatique de Grenoble
