# Sneaker Proxies

Sneakers proxies:

Upon assignment, sneakers proxies are checked and guaranteed to work only for the purchased service.

[GET STARTED](#)
An open source sneaker bot written in Python

OpenATC

OpenATC is the first large scale, open source sneaker bot project with the potential to target any shoe.

OpenATC will start by dumping beta scripts.

Installation

OpenATC requires Python 3, but should also work on Python 2.

You'll also need BeautifulSoup4 and requests:

$ pip install bs4
$ pip install requests
$ pip install urllib3 --upgrade

You may also wish to use the included set up script to fill in your info:

$ cd scripts
$ ./setup.sh

License

OpenATC is licensed under the MIT license.

The easy way
What to do with bots?
Results
This page is temporarily unavailable because a device from your location is sending large amounts of web requests. Visitors from other locations can still view the page.

I got banned on a different bot

No proxies

wtf L sir away gone

soft banned

rip

lol

same
Testimonies

Katrina Verey  @knvere
Developer - Cloud Platform

“When I was IMOC, I didn't notice the DDoS. Which is great, because IMOC not noticing means no incident!”

Jordan Wheeler  @jordan
Databases

“Now, we just don’t get paged in the first place for replication lag during flash sales! No more manual splunking for bots and shackling them.”
