OSDI ’20: 14th USENIX Symposium on Operating Systems Design and Implementation

November 4–6, 2020, Banff, Alberta, Canada

Sponsored by USENIX in cooperation with ACM SIGOPS

The 14th USENIX Symposium on Operating Systems Design and Implementation will take place on November 4–6, 2020, at the Fairmont Banff Springs in Banff, Alberta, Canada.

Important Dates

• Abstract registration due: Wednesday, May 20, 2020, 3:00 pm PDT
• Complete paper submissions due: Wednesday, May 27, 2020, 3:00 pm PDT

Author Response Period

• Reviews available: Tuesday, August 4, 2020
• Author responses due: Friday, August 7, 2020
• Notification to authors: Tuesday, August 18, 2020
• Final paper files due: Thursday, October 15, 2020

Conference Organizers

Program Co-Chairs
Jon Howell, VMware Research
Shan Lu, University of Chicago

Program Committee
Rachit Agarwal, Cornell University
Sebastian Angel, University of Pennsylvania
Tom Anderson, University of Washington
Andrea Arpaci-Dusseau, University of Wisconsin—Madison
Andrew Baumann, Microsoft Research
Irina Calciu, VMware Research
George Candea, École Polytechnique Fédérale de Lausanne (EPFL)
Rong Chen, Shanghai Jiao Tong University
Wenguang Chen, Tsinghua University
Vijay Chidambaram, The University of Texas at Austin and VMware Research
Byung-Gon Chun, Seoul National University
Natacha Crooks, Cornell University and University of California, Berkeley
Alexandra Fedorova, University of British Columbia
Jason Flinn, Facebook
Roxana Geambasu, Columbia University
Yossi Gilad, The Hebrew University of Jerusalem
Haryadi Gunawi, University of Chicago
Andreas Haeberlen, University of Pennsylvania
Tim Harris, Amazon
Chris Hawblitzel, Microsoft Research
Gernot Heiser, University of New South Wales Sydney and CSIRO’s Data61
Y. Charlie Hu, Purdue University
Ryan Huang, John Hopkins University
Rebecca Isaacs, Twitter
Frans Kaashoek, Massachusetts Institute of Technology
Manos Kapritsos, University of Michigan
Baris Kasikci, University of Michigan
Kimberly Keeton
Anne-Marie Kermarrec, École Polytechnique Fédérale de Lausanne (EPFL)
Ana Klimovic, Google Research and ETH Zurich
Jinyang Li, New York University
Wyatt Lloyd, Princeton University
Jay Lorch, Microsoft Research
Xiaosong Ma, Quatr Computing Research Institute
Kathryn S. McKinley, Google
James Mickens, Harvard University
Robert Morris, Massachusetts Institute of Technology
Derek Murray, Google
Madan Musuvathi, Microsoft Research
Bryan Parno, Carnegie Mellon University
Simon Peter, The University of Texas at Austin
Don Porter, The University of North Carolina at Chapel Hill
Dan Ports, Microsoft Research
Costin Răciuc, University Politehnica of Bucharest
Malte Schwarzkopf, Brown University
Ryan Stutsman, University of Utah
Michael Swift, University of Wisconsin—Madison
Kaushik Veeraraghavan, Facebook
Rashmi Vinayak, Carnegie Mellon University
Xi Wang, University of Washington
Yang Wang, The Ohio State University
John Wilkes, Google
Emmett Witchel, The University of Texas at Austin
Harry Xu, University of California, Los Angeles
Tianyin Xu, University of Illinois Urbana–Champaign
Junfeng Yang, Columbia University
Ding Yuan, University of Toronto
Nickolai Zeldovich, Massachusetts Institute of Technology
Irene Zhang, Microsoft Research
Yiying Zhang, University of California, San Diego
Lidong Zhou, Microsoft Research
Yuanyuan Zhou, University of California, San Diego

Sponsored by USENIX in cooperation with ACM SIGOPS
Steering Committee
Andrea Arpaci-Dusseau, University of Wisconsin—Madison
Jason Flinn, Facebook
Casey Henderson, USENIX Association
Kimberly Keeton
Hank Levy, University of Washington
James Mickens, Harvard University
Brian Noble, University of Michigan
Timothy Roscoe, ETH Zurich
Margo Seltzer, University of British Columbia

Overview
The 14th USENIX Symposium on Operating Systems Design and Implementation seeks to present innovative, exciting research in computer systems. OSDI brings together professionals from academic and industrial backgrounds in a premier forum for discussing the design, implementation, and implications of systems software. The OSDI Symposium emphasizes innovative research as well as quantified or insightful experiences in systems design and implementation.

OSDI takes a broad view of the systems area and solicits contributions from many fields of systems practice, including, but not limited to, operating systems, file and storage systems, distributed systems, cloud computing, mobile systems, secure and reliable systems, systems aspects of big data, embedded systems, virtualization, networking as it relates to operating systems, and management and troubleshooting of complex systems. We also welcome work that explores the interface to related areas such as computer architecture, networking, programming languages, analytics, and databases. We particularly encourage contributions containing highly original ideas, new approaches, and/or groundbreaking results.

Submitting a Paper
Submissions will be judged on novelty, significance, interest, clarity, relevance, and correctness. All accepted papers will be shepherded through an editorial review process by a member of the program committee.

A good paper will:
• Motivate a significant problem
• Propose an interesting, compelling solution
• Demonstrate the practicality and benefits of the solution
• Draw appropriate conclusions
• Clearly describe the paper’s contributions
• Clearly articulate the advances beyond previous work

All papers will be available online to registered attendees before the conference. If your accepted paper should not be published prior to the event, please notify production@usenix.org. The papers will be available online to everyone beginning on the first day of the conference, November 4, 2020.

Papers accompanied by nondisclosure agreement forms will not be considered. All submissions will be treated as confidential prior to publication on the USENIX OSDI’20 website; rejected submissions will be permanently treated as confidential.

Simultaneous submission of the same work to multiple venues, submission of previously published work, or plagiarism constitutes dishonesty or fraud. USENIX, like other scientific and technical conferences and journals, prohibits these practices and may, on the recommendation of a program chair, take action against authors who have committed them. See the USENIX Conference Submissions Policy (www.usenix.org/conferences/submissions-policy) for details.

Prior workshop publication does not preclude publishing a related paper in OSDI. Authors should email the program co-chairs, osdi20chairs@usenix.org, a copy of the related workshop paper and a short explanation of the new material in the conference paper beyond that published in the workshop version.

Questions? Contact your program co-chairs, osdi20chairs@usenix.org, or the USENIX office, submissionspolicy@usenix.org.

By submitting a paper, you agree that at least one of the authors will attend the conference to present it. If the conference registration fee will pose a hardship for the presenter of the accepted paper, please contact conference@usenix.org.

If your paper is accepted and you need an invitation letter to apply for a visa to attend the conference, please contact conference@usenix.org as soon as possible. (Visa applications can take at least 30 working days to process.) Please identify yourself as a presenter and include your mailing address in your email.

Deadline and Submission Instructions
Authors are required to register abstracts by 3:00 p.m. PDT on May 20, 2020, and to submit full papers by 3:00 p.m. PDT on May 27, 2020. These are hard deadlines, and no extensions will be given. Submitted papers must be no longer than 12 single-spaced 8.5” x 11” pages, including figures and tables, plus as many pages as needed for references, using 10-point type on 12-point (single-spaced) leading, two-column format, Times Roman or a similar font, within a text block 7” wide x 9” deep. Submissions may include as many additional pages as needed for references and for supplementary material in appendices. The paper should stand alone without the supplementary material, but authors may use this space for content that may be of interest to some readers but is peripheral to the main technical contributions of the paper. Note that members of the program committee are free to not read this material when reviewing the paper. Accepted papers will be allowed 14 pages in the proceedings, plus references. Papers not meeting these criteria will be rejected without review, and no deadline extensions will be granted for reformatting. Pages should be numbered, and figures and tables should be legible in black and white, without requiring magnification. Papers so short as to be considered “extended abstracts” will not receive full consideration.

The paper review process is double-blind. Authors must make a good faith effort to anonymize their submissions, and they should not identify themselves either explicitly or by implication (e.g., through the references or acknowledgments). Submissions violating the detailed formatting and anonymization rules will not be considered for review. If you are uncertain about how to anonymize your submission, please contact the program co-chairs, osdi20chairs@usenix.org, well in advance of the submission deadline.

When registering and submitting your paper, you will need to provide information about conflicts with PC members. Use the following guidelines to determine conflicts:
Institution: You are currently employed at the same institution, have been previously employed at the same institution within the past two years, or are going to begin employment at the same institution.

Advisor or Collaboration: You have a past or present association as thesis advisor or advisee, or you have a collaboration on a project, publication, grant proposal, or editorship within the past two years (2018 or later).

The PC will review paper conflicts to ensure the integrity of the reviewing process, adding conflicts if necessary.
if there is no basis for conflicts provided by authors, such conflicts will be removed (e.g., do not improperly identify PC members as a conflict in an attempt to avoid having an individual review your paper). If you have any questions about conflicts, please contact the program co-chairs.

Authors are also encouraged to contact the program co-chairs, osdi20chairs@usenix.org, if needed to relate their OSDI submissions to relevant submissions of their own that are simultaneously under review or awaiting publication at other venues. The program co-chairs will use this information at their discretion to preserve the anonymity of the review process without jeopardizing the outcome of the current OSDI submission.

Papers must be in PDF format and must be submitted via the submission form linked from the OSDI ’20 website. For more details on the submission process, and for templates to use with LaTeX, Word, etc., authors should consult the detailed submission requirements at www.usenix.org/osdi20/requirements-authors.

**Authors Response Period**

OSDI will provide an opportunity for authors to respond to reviews prior to final consideration of the papers at the program committee meeting. Authors must limit their responses to (a) correcting factual errors in the reviews or (b) directly addressing questions posed by reviewers. Responses should be limited to clarifying the submitted work. In particular, responses must not include new experiments or data, describe additional work completed since submission, or promise additional work to follow.

Submission of a response is optional. There is no explicit limit to the response, but authors are strongly encouraged to keep it under 500 words; reviewers are neither required nor expected to read excessively long rebuttals. Reviews will be available for response on Tuesday, August 4, 2020. Authors may submit a response to those reviews until Friday, August 7, 2020.
