

SOUPS 2020: Sixteenth Symposium on Usable Privacy and Security

August 9–11, 2020, Boston, MA, USA

In-cooperation with USENIX, the Advanced Computing Systems Association

The Sixteenth Symposium on Usable Privacy and Security (SOUPS 2020) will be co-located with the 29th USENIX Security Symposium (USENIX Security '20) and will take place August 9–11, 2020 at the Boston Marriott Copley Place in Boston, MA, USA.

Important Dates

All dates are at 23:59 AoE (Anywhere on Earth) time. These are firm deadlines; no extensions will be granted.

- Paper Registration Deadline: **Thursday, February 20, 2020**
- Paper Submission Deadline: **Thursday, February 27, 2020**
- Early Rejection Notification: **Wednesday, April 1, 2020**
- Rebuttal Period: **Thursday, April 30–Thursday, May 7, 2020**
- Paper Notifications: **Wednesday, May 20, 2020**
- Camera Ready Deadline: **Tuesday, June 16, 2020**

Symposium Organizers

General Chair

Heather Richter Lipford, *University of North Carolina at Charlotte*

Vice General Chair

Sonia Chiasson, *Carleton University*

Technical Papers Co-Chairs

Joe Calandrino, *Federal Trade Commission*

Michelle Mazurek, *University of Maryland*

Technical Papers Committee

Adam Aviv, *The George Washington University*

Lujo Bauer, *Carnegie Mellon University*

Cristian Bravo-Lillo, *Ciberseguridad Humana, Chile*

Lynne Coventry, *Northumbria University*

Lorrie Cranor, *Carnegie Mellon University*

Heather Crawford, *Florida Institute of Technology*

Tamara Denning, *University of Utah*

Serge Egelman, *International Computer Science Institute (ICSI) and University of California, Berkeley*

Sascha Fahl, *Leibniz University Hannover*

Carrie Gates, *Bank of America*

Maximilian Golla, *Max Planck Institute for Cyber Security and Privacy*

Julie Haney, *National Institute of Standards and Technology (NIST)*

Marian Harbach, *Google*

Jun Ho Huh, *Samsung Research*

Maritza Johnson, *Google*

Apu Kapadia, *Indiana University Bloomington*

Jennifer King, *Stanford University*

Katharina Krombholz, *CISPA Helmholtz Center for Information Security*

Ada Lerner, *Wellesley College*

Janne Lindqvist, *Aalto University and Rutgers University*

Abigail Marsh, *Macalester College*

Susan E. McGregor, *Tow Center for Digital Journalism, Columbia Journalism School*

Robert Reeder, *Google*

Irwin Reyes, *Two Six Labs*

Scott Ruoti, *University of Tennessee, Knoxville*

Florian Schaub, *University of Michigan*

Kent Seamons, *Brigham Young University*

Manya Sleeper, *Google*

Elizabeth Stobert, *Carleton University*

Jose Miguel Such, *King's College London*

Blase Ur, *University of Chicago*

Emanuel von Zezschwitz, *Google*

Rick Wash, *Michigan State University*

Josephine Wolff, *Fletcher School, Tufts University*

Mary Ellen Zurko, *MIT Lincoln Laboratory*

Lightning Talks and Demos Co-Chairs

Yousra Javed, *Illinois State University*

Blase Ur, *University of Chicago*

Karat Award Chair

Rick Wash, *Michigan State University*

Posters Co-Chairs

Heather Crawford, *Florida Institute of Technology*
Maximilian Golla, *Max Planck Institute of Cyber Security and Privacy*

Tutorials and Workshops Co-Chairs

Katharina Krombholz, *CISPA Saarland*
Daniel Zappala, *Brigham Young University*

Mentoring Co-Chairs

Adam Aviv, *The George Washington University*
Daniela Napoli, *Carleton University*
Daniel Votipka, *University of Maryland*

Publicity Co-Chairs

Nalin Asanka Gamagedara Arachchilage, *University of New South Wales*
Yaxing Yao, *Syracuse University*

Email List Chair

Lorrie Cranor, *Carnegie Mellon University*

Accessibility Chair

Rich Williams, *USENIX Association*

USENIX Liaison

Casey Henderson, *USENIX Association*

Overview

The 2020 Symposium on Usable Privacy and Security (SOUPS) will bring together an interdisciplinary group of researchers and practitioners in human computer interaction, security, and privacy. The program will feature:

- Technical papers, including replication papers and systematization of knowledge papers
- Workshops and tutorials
- A poster session
- Lightning talks

Technical Papers

We invite authors to submit previously unpublished papers describing research or experience in all areas of usable privacy and security. We welcome a variety of research methods, including both qualitative and quantitative approaches. Papers will be judged on their scientific quality, overall quality, and value to the community. Topics include, but are not limited to:

- Innovative security or privacy functionality and design
- Field studies of security or privacy technology
- Usability evaluations of new or existing security or privacy features
- Security testing of new or existing usability features
- Longitudinal studies of deployed security or privacy features
- Studies of administrators or developers and support for security and privacy
- The impact of organizational policy or procurement decisions
- Lessons learned from the deployment and use of usable privacy and security features
- Foundational principles of usable security or privacy
- Ethical, psychological, sociological aspects of usable security and privacy
- Usable security and privacy implications/solutions for specific domains (e.g., IoT, medical, vulnerable populations)

- Replicating or extending important previously published studies and experiments
- Systematization of knowledge papers that integrate and systematize existing knowledge to provide new insight into a previously studied area

Paper Registration: Technical papers must be registered by the deadline listed above. Registration is mandatory for all papers. Registering a paper in the submission system requires filling out all the fields of the online form that describe the submission, but does not require uploading a PDF of the paper. *This information must describe the paper accurately, in sufficient detail to assign appropriate reviewers. Placeholder, incomplete, or inaccurate titles and abstracts may result in rejection without review.*

Paper Submission: Technical papers must be uploaded as PDFs by the deadline listed above. All submissions must follow the guidelines described below. *Submissions that violate any of the requirements below may be rejected without review.*

Contact the program chairs at soups20chairs@usenix.org if you have any questions about these requirements.

Format and Page Limits: Papers must use the SOUPS formatting template (available for MS Word or LaTeX) and be submitted as a PDF via the web submission system, linked from the SOUPS 2020 Call for Papers web page. Submissions must be no more than 12 pages (excluding acknowledgments, bibliography, and appendices). *For the body of your paper, brevity is appreciated, as evidenced by the fact that many published papers in prior years have been well under this limit.*

Submissions may include as many additional pages as needed for references and for supplementary material in appendices. The paper should stand alone without the supplementary material, but authors may use this space for content that may be of interest to some readers but is peripheral to the main contributions of the paper. Note that members of the program committee are free to not read this material when reviewing the paper.

Paper Content: Papers need to describe the purpose and goals of the work, cite related work, show how the work effectively integrates usability or human factors with security or privacy, and clearly indicate the innovative aspects of the work or lessons learned as well as the contribution of the work to the field. The paper abstracts should contain a sentence summarizing the contribution to the field and literature.

All submissions must clearly relate to the human aspects of security or privacy. Papers on security or privacy that do not address usability or human factors will not be considered. Likewise, papers on usability or human factors that do not address security or privacy will not be considered. The determination of whether a paper is within scope will be solely at the discretion of the program committee chairs.

Systematization of Knowledge Papers: We are soliciting Systematization of Knowledge (SoK) papers that integrate and systematize existing knowledge to provide new insight into a previously studied area of usable security or privacy. SoK papers should draw on prior work to put forth a new taxonomy, argument, or observation in an area in which substantial work has already been done. SoK papers should be more than a survey or summary of prior work in an area. SoK papers will be held to the same scientific and presentation standards as other technical papers. Please prefix the title of these papers with "SoK:" and check the SoK checkbox on the submission form to flag them for the review process.

Replication Papers: In addition to original work, we are soliciting well-executed replication studies that meaningfully confirm, question, or clarify the result under consideration. Please prefix the title of these papers with the word “Replication:” for the review process.

Replication papers should aim to replicate important/influential findings from the literature. They may not necessarily offer new or unexpected findings; papers confirming previous findings are also considered contributions. Replication of a result that has already been replicated many times is less valuable. Replication of an obscure study that originally had only minimal influence on the community is less valuable. Authors should clearly state why they conducted a replication study, describe the methodological differences precisely, and compare their findings with the results from the original study.

Replications paper will be held to the same scientific standards as other technical papers. They should use currently accepted methodologies and technologies. Authors should not reuse outdated methods/technologies simply because they were used in the original paper. Replications may follow the same protocol as the original study, or may vary one or more key variables to see whether the result is extensible (e.g., re-running a study with a sample from a different population).

Anonymization: Reviewing is double-blind. No names or affiliations should appear on the title page or in the body of the paper, acknowledgments should be blinded, and papers should avoid revealing the authors’ identities in the text. *Any references to the authors’ own work should be made in the third person as if it was work by someone else.* Appendices and figures should also be blinded (e.g., do not leave logos or contact info on study materials, and remove de-anonymizing URLs from screenshots). Please ensure all author names, affiliations, locations, URLs, etc. have been removed; even minor mistakes may result in rejection without review. Contact the program chairs at soups20chairs@usenix.org if you have any questions about how to anonymize your submission.

Overlap with Previous Papers: Submitted papers must not significantly overlap with papers that have been published or that are simultaneously submitted to a peer-reviewed, archival venue or publication. Any overlap between your submitted paper and other work either under submission, previously published, or submitted elsewhere before the SOUPS notification deadline must be documented in an explanatory note sent to the chairs. State precisely how the two works differ in their goals, share experiments or data sources, and offer unique contributions. If the other work is under submission elsewhere, the program committee may ask to review that work to evaluate the overlap. Please note that program committees frequently share information about papers under review and reviewers usually work on multiple conferences simultaneously. Technical reports, e.g., arXiv reports, are exempt from this rule. If in doubt, please contact the program chairs at soups20chairs@usenix.org for advice.

Self-plagiarism includes verbatim or near-verbatim use of one’s own published work without citing the original source, and is generally not acceptable. In some cases, it may be acceptable to include a *brief* portion of selected content from the introduction, background, related work, or methods of a closely related paper. In these cases, the original paper must be explicitly referenced and the overlap should be clear to the reader. The reused content must not be part of the main contributions of the paper and, where possible, rewriting the text is preferred. Papers with significant text reuse may be rejected because of too much overlap. If in doubt, please contact the program chairs at soups20chairs@usenix.org for advice.

Appendices: Authors may attach to their paper supplementary appendices containing study materials (e.g., survey instruments, interview guides, etc.) that would not otherwise fit within the body of the paper. These appendices may be included to assist reviewers with questions that fall outside the stated contribution of your paper on which your work is to be evaluated. Reviewers are not required to read any appendices, so your paper should be self-contained without them. (We note that in recent years, the inclusion of study materials as appendices has become very common, and reviewers often find it very useful.) Accepted papers will be published online with their supplementary appendices included.

Conflicts of Interest: The submission system will request information about conflicts of interest between the paper’s authors and program committee (PC) members. It is the full responsibility of all authors of a paper to identify their potential conflict-of-interest PC members, according to the following definition. A paper author has a conflict of interest with a PC member when one or more of the following conditions holds:

1. The PC member is a co-author of the paper.
2. The PC member has been a co-worker in the same company or university within the past four years.
3. The PC member has been a collaborator within the past four years.
4. The PC member is or was an author’s thesis advisor, no matter how long ago.
5. An author is or was the PC member’s thesis advisor, no matter how long ago.
6. The PC member is a relative or close personal friend of the author.

Ethical Research: User studies should follow the basic principles of ethical research, including beneficence (maximizing the benefits to an individual or to society while minimizing harm to the individual), minimal risk (appropriateness of the risk versus benefit ratio), voluntary consent, respect for privacy, and limited deception. Studies that rely on crowdworkers can incur additional ethical obligations, including but not limited to paying a fair wage. Some example ethical guidelines generated by Mechanical Turk crowdworkers can be found at [wearodynamo.com/wiki/Guidelines_for_Academic_Requesters](https://www.wearodynamo.com/wiki/Guidelines_for_Academic_Requesters).

Authors are encouraged to include in their submissions explanation of how ethical principles were followed, and may be asked to provide such an explanation should questions arise during the review process. If your organization or institution requires formal clearance for research with human subjects, your paper may be rejected if clearance was not obtained. However, such clearance alone does not guarantee acceptance and the program committee may reject a paper on ethical grounds.

Early Rejections: Papers that receive substantially negative initial reviews will be rejected early. The authors of early-rejected papers, and only such papers, will receive a copy of their initial reviews. At this point, papers are no longer considered under submission (except if authors appeal).

Authors who substantively disagree with the reviews can appeal to the program committee chairs. Authors’ appeals must clearly and explicitly identify concrete disagreements with factual statements in the initial reviews. Appealing a submission that was rejected early will keep it under consideration, and it cannot be withdrawn or resubmitted elsewhere until the final notification of acceptance or rejection.

Rebuttals: The rebuttal period will be held after the second round of reviews, so the authors will be given a chance to see and correct factual errors in all reviews. Authors may provide a short rebuttal that will be considered in subsequent discussions. Authors' rebuttals must clearly and explicitly identify concrete issues with factual statements in the initial reviews, or provide clarification to explicit reviewer questions. Due to time constraints, the rebuttal period is fairly short. *Please ensure that you reserve enough time between April 30 and May 7 for the rebuttal process. Late rebuttals will not be accepted.*

Publication: Accepted papers will be published by the USENIX Association, and will be freely available on the USENIX and SOUPS websites. Authors will retain copyright of their papers. Authors may also release pre-prints of their accepted work to the public at their discretion.

Presentation: For accepted papers, at least one of the paper authors must attend the conference and present the work.

* Conflict of Interest and Early Rejection policies adapted from IEEE Symposium on Security and Privacy 2017

* Replication papers description adapted from Elsevier Journal of Molecular and Cellular Cardiology

* SoK papers description adapted from IEEE Symposium on Security and Privacy 2018
