SOUPS 2019: Fifteenth Symposium on Usable Privacy and Security

AUGUST 11–13, 2019 • Santa Clara, CA, USA

In-cooperation with USENIX, the Advanced Computing Systems Association

SOUPS 2019 will be co-located with the 28th USENIX Security Symposium, August 11–13, 2019, in Santa Clara, CA, USA.

Important Dates
All dates are at 23:59 AoE (Anywhere on Earth) time.
• Proposal submission deadline: Monday, March 11, 2019
• Notification of acceptance: Thursday, March 21, 2019
• Final workshop CFP due date for workshop organizers: Monday, April 8, 2019
• Workshop paper submission due: Friday, May 24, 2019
• Workshop paper acceptance notification to authors: Saturday, June 8, 2019
• Workshop camera ready papers due: Wednesday, June 19, 2019

Organizers
Tutorials and Workshops Co-Chairs
Elissa Redmiles, University of Maryland
Daniel Zappala, Brigham Young University

Overview
The Symposium on Usable Privacy and Security (SOUPS) features a day of pre-symposium workshops, tutorials, hackathons, and other events to support exploration and networking related to topics of interest to the usable privacy and security community. We invite you to submit a proposal to organize a full- or half-day event on August 11, 2019, as part of SOUPS 2019 in Santa Clara, CA, USA.

Pre-symposium events enable attendees with shared interests to meet in the context of a focused and interactive discussion. We are looking for proposals for any of the following types of events:
• Workshops: Workshops are an opportunity to move a topic forward and build community. SOUPS workshops might address basic research, applied research, practice, education, methodologies, competitions, or emerging topics in usable privacy and/or usable security. Some workshops involve calls for position papers, while others involve creative activities and more informal guided discussions around a common topic of interest. Successful workshops at previous SOUPS include: Who are you?! Adventures in Authentication, Workshop on Security Information Workers, Workshop on Inclusive Privacy and Security, Workshop on Usable Security and Privacy Education, and Workshop on the Human Aspects of Smarthome Security and Privacy.
• Tutorials: A SOUPS tutorial is an in-depth learning experience on one or more state-of-the-art topics in usable privacy and security presented by researchers or practitioners within the field. A tutorial should focus on its topic in detail and include references to the “must-read” papers or materials within its domain. Tutorials in which participants actively engage in exercises or hands-on work are particularly welcome. Successful tutorials at previous SOUPS include: Introduction to Password Cracking and Research on Passwords, Hacking Public Policy, and Working with Computer Forensics Data.
• Hackathons/Design-a-thons: Hackathons and design-a-thons present an opportunity to bring together hackers, designers, policy makers, researchers, and coders to push boundaries in usable security and privacy. A hackathon should focus on a particular set of topics and include an explanation of how the tools, solutions, and problems developed through the event will help the research community or society at large and continue moving forward after the event. We had a successful design-a-thon last year called Designing Privacy and Security Tools for Children and Teenagers. Similar events at CHI have included a Hacking Women’s Health and Critical Making Hackathon: Situated Hacking, Surveillance and Big Data.
• Other: Do you have a great idea for a SOUPS event that doesn’t fit any of the categories above? We are looking forward to your proposal!

Submission Instructions
Submissions will be solicited via the web submission form linked from the Call for Workshops, Tutorials, and Hackathons web page. The submission form includes the following items:
• Title of Event
• List of Organizers (including affiliations and contact information)
• Event Type (workshop, tutorial, hackathon/design-a-thon, or other)
• Event Length (half day, full day, or full day but could work as half day)
• Description (maximum of 500 words): Describe the event's goal, scope, format (i.e., will you solicit submissions via a CFP or will attendees be engaged in other ways), and structure
• Abstract (200 words): abstract promoting the event to be posted on the SOUPS website
• Promotional strategy: how do you plan to attract participants for your event?
• Draft CFP (PDF): Upload a draft of your call for papers, if applicable
• Sample agenda: how do you plan to structure the event? Include planned sessions, etc.
• Event requirements: List any audio/video, space, or other requirements for your event

Upon Acceptance of Your Event
Please note the following milestones which must be met for all SOUPS workshops, tutorials, and events:
• Organizers will be notified of acceptance or rejection by March 21, 2019.
• Organizers will have until April 8, 2019, to submit their final workshop/tutorial/event descriptions to be posted on the SOUPS website. Workshop organizers will submit their Call for Papers/Participation on the same date. Organizers need to create a website for their accepted
event and include the URL address in their Call for Participation/description for the SOUPS website.

- **Solicit Contributions and Potential Participants:** While some organizers may choose alternate formats, for events accepting paper submissions, workshop papers are typically 2-4 pages long. Workshop paper submissions (if applicable) should be due no later than May 24, 2019.
- Final acceptances for workshop papers must be completed by June 8, 2019. This will give participants enough time for early registration to the symposium.
- Accepted papers will not be posted on the USENIX website to avoid confusion with archival papers and encourage more informal or experimental workshop formats. Workshop organizers are expected to create an event website to which the SOUPS website will link. Workshop organizers can then decide to post accepted papers and other workshop/tutorial/event materials before the workshop date on their own website.
- **Publicize Your Workshop:** Organizers of an accepted workshop must set up and maintain their own website in which they provide further and updated information about their workshop. The workshop page will be linked from the official SOUPS web page. In order to have a successful and well-attended workshop, we recommend that you post your call for participation early and widely (e.g. publicize on social media and on relevant mailing lists).

**Workshop Registration Fees**
Due to the co-location with USENIX Security this year, SOUPS is operating on a different fee structure, requiring a fee for workshop, tutorial, and/or event participation ($150). Event organizers receive one complimentary registration per event.

**Contact**
For questions or to discuss the suitability of a workshop or tutorial idea please contact the workshop chairs at soups19-workshops@usenix.org.
