

Context-centric Security

Mohit Tiwari, Prashanth Mohan, Andrew Osheroﬀ, and Hilfi Alkaff, *University of California, Berkeley*; Elaine Shi, *University of Maryland, College Park*; Eric Love, Dawn Song, and Krste Asanović, *University of California, Berkeley*

The general consensus from the committee was that the work was interesting, but had some reservations about some of the novelty of the work. There were also some concerns about the paper’s clarity, particularly with respect to which applications would be appropriate for the “bubbles” model. Examples would really help make this more clear. The final result was that the PC members agreed unanimously for accepting the paper.
