Acknowledgments

We thank the shepherd and the reviewers. This paper was result of the research project supported by SK hynix Inc. This work was supported in part by PRISM, one of the seven centers in JUMP 2.0, a Semiconductor Research Corporation (SRC) program sponsored by DARPA. This work was partly supported by Institute of Information & Communications Technology Planning & Evaluation (IITP) grant funded by the Korea government (MSIT) (RS-2025-02214654 and RS-2024-00456287). The ICT at Seoul National University provided research facilities for this study.
